**Perpetuum Strengthens Management Team to Focus on Growth**

Chicago, IL (June 16, 2010) – Perpetuum today announced two new appointments to strengthen its management team.

Dr. Steve Turley will join the company as CEO and Dr. David Parker will join as Chairman. These appointments are part of the company’s investment for the future as it moves into the next stage of growth for the company.

Steve Turley commented: “I am very excited to be joining Perpetuum with its market leading products and exciting prospects for growth. I have been very impressed by the technology, the team, and their commitment to success.”

Roy Freeland, Founder and President of Perpetuum added: “We are very glad to have been able to secure the services of two such strong additions to the management team to support the company through the next stage of its development.”

Perpetuum is the global leader in Vibration Energy Harvesting for the rapidly expanding Wireless Sensor Network market and supplies product to the leaders in the industry. Its microgenerators provide reliable power to enable the rapid deployment of such networks worldwide.

Both David Parker and Steve Turley have long careers in technology based businesses with a track record of delivering rapid growth in fast moving markets. “David brings a wide range of experiences to the board of Perpetuum with operational CEO roles in large Hi Tech businesses along with serving on the board of a number of venture backed enterprises. Steve’s career includes senior positions in Sales & Marketing, Manufacturing Operations, Strategic Alliances and General Management including Chief Commercial Officer of Bookham (now Oclaro) and Vice President at Nortel.

###

**About Perpetuum:**

UK-based Perpetuum Ltd is a world leader in vibration energy harvesting, producing the first commercially available vibration energy harvester for industry, the PMG17. Using normal vibration created by machinery as a source of energy, the PMG17 is an enabling technology for fast-growing wireless sensor node applications. Perpetuum’s innovative power source enables continuous online monitoring for proactive asset management, helping organizations strive toward operational excellence.
